

# Transcription & Genome Integrity minisymposium Thursday, December 8<sup>th</sup> 2021

**9:30:** Introduction by László Tora

**9:40: Dr Jenny Wu** (Rennes Institute for Genetics and Development, France)  
*Modulating the replication program: inputs from CDK regulation*

**10:10: Dr Dominique Helmlinger** (Montpellier Cell Biology Research Center, France)  
*New insights into transcription co-activator functions from acute perturbation strategies*

**10:40: Pr David Shore** (University of Geneva, Switzerland)  
*A novel mechanism linking proteostasis to transcriptional control of ribosome biogenesis in yeast*

**11:10-11:20: break**

**11:20: Dr Mounia Lagha** (Institute of Molecular Genetics of Montpellier, France)  
*Gene expression dynamics during the awakening of the zygotic genome*

**11:50: Dr Nicola Iovino** (Max Planck Institute of Immunobiology, Freiburg, Germany)  
*Chromatin regulation of zygotic genome activation*

*All communications will be live only*
